MICHAEL ROBINSON

DEVELOPER

I am a developer with a demonstrated history of creating dynamic web applications. I have experience in all stages of the development lifecycle with strong technical and problem-solving skills, Bringing in other aspects from previous roles allows me to develop excellent interpersonal skills enabling me to communicate and collaborate with people of all levels.
I am always working to improve my current skills and I can learn new things quickly.
I am eager to be challenged in order to grow both personally and in the companies I work for.
